

ABHINABH BAHADUR SHAKYA

MBA / PYTHON DEVELOPER

PROFILE

Passionate back-end web developer with a background in Python programming learned through Udemy Academy. Proficient in object-oriented programming (OOP) and familiar with databases (SQL) and data management. Excellent problem-solving and troubleshooting skills, with a great eye for detail and a strong dedication to achieving deadlines. Familiar with Python frameworks like Flask, as well as front-end development techniques.

WORK EXPERIENCE

Cloudfactory

2021 - 2023

Business Classifier

- Collect and analyze information from multiple sources to find out a different company name, location, website, and sales revenue

Audio Annotation

- Monitoring recorded customer calls to identify the agent performance
- Marking the mistakes made by the agent to review their performance
- Uncovering Potential Issues Within the Service Experience by giving ratings to the agents
- Reevaluating the calls made by the team member to ensure that the agent's recorded call has been correctly analyzed

Image Annotation

- Use of image annotating software such as Darwin v7 to label images of pipes and flanges.
- Reviewing the image done by the team members to check whether the image labeled by them is correct or not.
